CHIBUIKE EMMANUEL ODELE

FRONTEND DEVELOPER

Enthusiastic and creative Front-End Developer with experience in building responsive and user-friendly websites. Adept in HTML, CSS, JavaScript, and modern front-end frameworks such as React. Eager to contribute to a dynamic development team and grow professionally by creating engaging user experiences.

Projects

- Stopwatch App (JavaScript + React Hooks) Developed a functional stopwatch using React Hooks for state and effect management. Implemented start, pause, and reset features with a clean and intuitive UI.

-To-Do List App (React + Local Storage) Created an interactive to-do list using React for task management. Integrated local storage to persist user tasks and applied conditional rendering for completed items.

-Weather App (React + API Integration) Built a weather forecasting app using React and OpenWeatherMap API. Displayed real-time weather updates and city search functionality with responsive design.

-Car Shop Website (React + Bootstrap) Designed and implemented a car shop web interface showcasing vehicle listings and details. Integrated filtering options, reusable components, and responsive layout using Bootstrap and React.

Skills

- Html
- Css
- JavaScript
- Bootstrap
- React
